

HIGH PERFORMANCE CUSTOM PRODUCTS TO SUIT YOU

Euro Glaze Adelaide offers a variety of window and door shapes and styles to suit your home's aesthetic and your needs: Fixed, Tilt and Turn, Sliding, Folding and many combinations.

Frames are available in uPVC, aluminum or timber.

uPVC is tough, **durable** and requires very little maintenance - no need to paint and easy to clean! The fire resistant self-extinguishing Polymer is safe and **eco-friendly**, is non-corrosive, does not rot or rust, and is unaffected by termites and weather extremes. uPVC is available in classic white, woodgrain-look or in a range of solid colour options.

OUR QUALITY SERVICE

Euro Glaze Adelaide's reliable, experienced experts will provide you with considered consultation and careful on-site installation services.

INNOVATIVE DESIGN BENEFITS

The combination of an Argon gas filled chamber between the glass layers, and uPVC frame perfect-seal technology provides **insulation**, prevents fog and condensation on glass, makes openings draught-proof, and provides an **acoustic barrier** to the outside.

EURO GLAZE ADELAIDE PROVIDES SUPERIOR QUALITY GERMAN DESIGNED DOUBLE OR TRIPLE GLAZED WINDOWS AND DOORS TO AUSTRALIAN HOMES.

-  100% manufactured in Europe, our windows and doors are custom made to meet your individual requirements.
-  Experience energy efficiency, year-round temperature stability, noise reduction, increased security and cost savings with our products.
-  Increase the value of your property with quality, sustainable, innovative modern windows and doors.

The "Tilt" opening design allows air to flow through whilst keeping your home secure from intruders. This, in addition to the burglar resistant glazing and lockable handles can improve the **security** of your home.

Above: Window in turn action state. Handle turns 90° to open the window in the turn state.

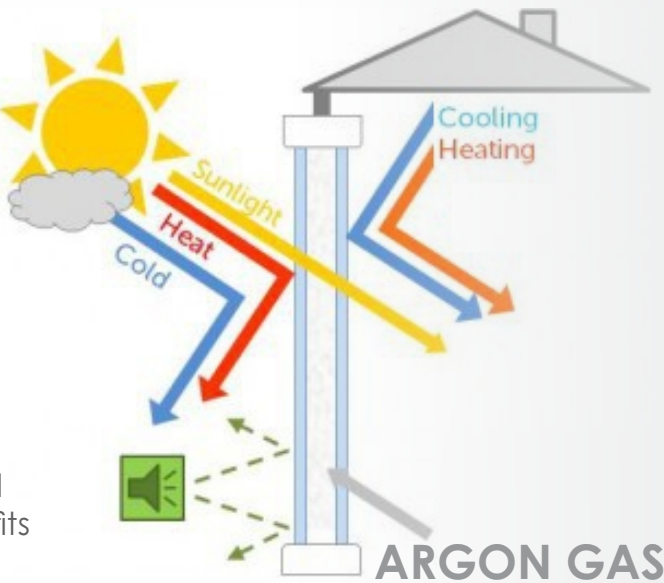

Above: Window in tilt action state. Handle turns 180° to open the window in the tilt state.

ENERGY EFFICIENT YEAR-ROUND COMFORT

Double or triple glazed windows and doors are a **smart solution** to counter the effects of Australia's harsh weather conditions on your home.

Replacing your windows and doors with our **highly thermally efficient** technologically advanced double or triple glazed windows and doors will prevent heat loss in winter, and conserve cool internal temperatures in summer. With energy prices on the rise, being able to reduce your artificial heating & cooling use will generate huge **cost savings** for you and benefits for the environment.

MAKE A VALUABLE INVESTMENT AT AN AFFORDABLE PRICE

With multi-pane glazed products used so predominantly in Europe we are able to import a range of premium, fit for purpose products at **affordable** prices to the Australian market. See return on your investment by making the smart choice to install double or triple glazed products, cutting your costs in the short and long term.
